Education

Bachelor of Engineering in Computer Science

Sir M. Visvesvaraya Institute of Technology, Bangalore

2022 – 2026

CGPA: 9.2 / 10

Pre-University (PU)

BGS PU College, Chikkaballapura

2020 – 2022

Percentage: 95.5%

10th Standard

Sterling English High School, Budigere

2020

Percentage: 90.5%

Skills

Languages: Java, Python, JavaScript

Core Concepts: Object-Oriented Programming, Data Structures and Algorithms, Computer Networks

AI & Machine Learning: NLP, LLMs, RAG, Prompt Engineering, AI Pipelines

AI Tools & Frameworks: MediaPipe, spaCy, NumPy, Pandas

Frontend: HTML, CSS, React.js, DOM, jQuery

Backend: Flask, REST APIs, Node.js, Express.js

Databases: SQL

Tools: GitHub, Postman, Vercel, AWS, Visual Studio Code, Excel

Projects

Real-Time Hand Sign to Speech Translator (BiLSTM) | *Python, MediaPipe, Tkinter*

Nov 2025

- Built a system that recognizes **ASL** hand gestures and converts them into text and speech in real time.
- Collected and annotated gesture sequences via webcam and extracted skeletal hand landmarks with **MediaPipe**.
- Trained a **BiLSTM** model to capture temporal patterns and distinguish visually similar signs.
- Built a GUI with Python **Tkinter** to display real-time predictions and integrated **pyttsx3** for speech output.

Prepwise – Voice Interview Practice Platform | *React.js, Gemini API*

Jan 2025

- Developed a real-time voice-based interview practice platform with a responsive **React.js** interface.
- Integrated the **Gemini API** for question generation and feedback to personalize interview sessions.
- Used reusable **UI** components for recording, input, and result display to speed up development.

Medical Text Analysis and Patient Records | *Python, Flask, spaCy*

Apr 2024

- Converted unstructured medical text into standardized patient records using Python and NLP.
- Built a **Flask**-based **REST** backend and used **spaCy** for entity extraction and classification.
- Created a simple **HTML/CSS** interface for record input, viewing, and editing.

Experience

Android App Development Intern

Jan 2026

MindMatrix

Remote

- Worked on **Android application** features through guided tasks and structured modules using **Generative AI**.
- Supported implementation, testing, and documentation to enhance product quality and usability.

Web Developer Intern

May 2025

Prodigy InfoTech

Remote

- Designed and developed responsive web applications using **HTML, CSS, JavaScript**, and **React**.
- Implemented new features and optimizations to improve functionality and user experience.

Achievements & Certifications

- Received an award and certificate for academic excellence in the first year of engineering.
- Completed *The Complete **Full-Stack Web Development** Bootcamp* by Angela Yu (Udemy).
- Completed *Mastering Data Structures & Algorithms using C and C++* on Udemy.
- Published the research paper “Real-Time Hand Sign to Speech Translator” in **IJIRT**.
